70         string imageURI;
71         string followNFTURI;
72     }
```

DataTypes.sol

Natal Chart NFTs: What data type?

Note: We want these natal charts to be shareable (I spent a lot of time coding them...).

Publication?

- Is it possible to share Publications across different Lens apps?

Regular NFT (ERC721)?

- Is there a way to 'naturally' integrate traditional ERC721 with the Lens Protocol?
